

ICT Organics Announces New Distribution Partner

Vertical Market Growth Continues As Organic Sales Soar Nationwide

COLUMBIA, MD — May 21, 2009 — ICT Organics, LLC announced it has reached a distribution agreement with Purely Organics of York Harbor, ME to distribute its entire line of 1-2-3 Easy Tea™ organic lawn and landscape products to its commercial turf customers throughout the states of Maine and New Hampshire.

“We are thrilled to have both Jim Reinertson and Purely Organics on board,” said Bill Skerrett, founder and CEO of ICT Organics. “As the sustainable and organic market grows they are just the kind of experienced, forward looking partners we need.”

The ICT Organics 1-2-3 Mix & Spray™ system was designed with the convenience and the success of the landscape professional in mind. It provides all the soil and plant health benefits of professionally brewed compost teas but with no need for tank trucks, and no crews waiting around for deliveries. The company produces a range of products for turf maintenance as well as sod establishment, hydro-seeding, and shrub or tree transplanting.

“We are very excited about this exclusive relationship with ICT Organics,” said Reinertson. “Their proven technology, and strong technical support are just the thing we are looking for as we expand our organic offerings, to the country club, college, and municipal turf management markets.”

Purely Organics has more than 1,000 residential accounts, as well as management relationships with municipalities, colleges, school districts and even a baseball team throughout its service region, using a full range of OMRI and USDA certified organic products.
